SUMMARY

Dynamic Full Stack Developer skilled in the MERN stack with experience building scalable, high-performance web applications. Experienced in creating responsive user interfaces and reliable backend APIs for smooth user experiences. Passionate about solving real-world problems with clean, maintainable code, while continuously learning new technologies to deliver innovative and effective solutions.

WORK EXPERIENCE

Freelancing Web - Present

- Delivered paid projects using MERN stack.
- Managed end-to-end development, deployment, and client support.

IT Instructor (Jul 2024 - Sep 2024)

Shaheen Public Higher Secondary School, Hyderabad, Sindh

- Taught computer science fundamentals, programming basics, and software applications to students.
- Developed lesson plans, conducted practical labs, and assessed student progress.
- Assisted students in developing problem-solving and technical skills

PROJECTS

MediShift-Align — Healthcare Shift Management Platform

- Built a full-stack MERN web application connecting medical professionals with healthcare facilities for real-time shift management and credential verification.
- Integrated email/SMS notifications, compliance audit trails, and performance analytics

EcoTracker — Community Environmental Reporting Platform

- Developed a full-stack environmental issue reporting system with real-time map-based incident tracking and staff assignment.
- Integrated Leaflet.js for interactive maps and Geolocation API for auto-detecting/logging user coordinates.
- Enabled admins to monitor reports on a heatmap and assign staff based on availability and proximity

TrunPage – Online Bookstore Platform (June 2025)

- Designed and developed a full-stack MERN-based e-commerce platform for browsing, purchasing, and downloading digital books.
- Implemented category-based filtering, order tracking, and admin dashboard for inventory and sales management.
